

ASEF Classroom Network #ASEFClassNet School Collaboration 2019

Proposal

1. Title of the Online Collaboration (Max. 6 words)

Space Exploration Buddies

2. Name and contact details of project co-ordinator(s)

Ms May Ling ONN
Science Teacher
Sri KDU Secondary School
Malaysia
E: onnmayling@hotmail.com
W: <http://www.srikdu.edu.my/secondary.aspx?cid=13>

3. School description (Max. 30 words)

Sri KDU Secondary Private School is located in Selangor state, Malaysia. It has a total of 1246 learners that are taught using the International Curriculum (CIE) alongside the National Curriculum.

4. Summary of the Proposed Online Collaboration (Max. 200 words)

'Once you've been in space, you appreciate how small and fragile the Earth is.', said Valentina Tereshkova. Space exploration is important not only to satisfy humanity's curiosity of the great beyond, but also for the future of the Earth. By 2050, the world's population will reach 9.1 billion, as reported by the Food and Agricultural Organization. The United Nations is working with European Space Agency on space solutions such as Galileo system or Earth Observation technologies to achieve the Sustainable Development Goals.

However, space science is lacking in education, and only a small proportion of students seems interested in STEM. What can we do better as schools to prepare our students to think beyond the Earth? This project encourages students and teachers across Asia and Europe to create a "space network" on the space technologies and developments. Students will carry out research and conduct interviews to understand the challenges of communicating about space exploration and find out ways to expand this knowledge to their peers. Students will create awareness by creating videos of their findings and share them on online platforms. This project also aims to link multiple disciplines in the space science education by gathering participants from various backgrounds.

**5. The Online Collaboration falls under the main themes of:
Please state "1" to "3" in level of relevance**

10. Learning objectives and outcomes for teachers and students

(Please list at least 3 learning objectives and outcomes for teachers and students respectively.)

Learning Objectives	Outcomes
Teachers should join to:	For Teachers:
1. Build a supportive network for teachers and students across Asia and Europe to engage in a cooperative and collaborative learning	1. Information exchange and sharing among a community with diverse and intercultural background
2. Facilitate discussion and learning among students across Asia and Europe on the progress of their research on the challenges of communicating about Space Exploration.	2. Teachers will be able to create an environment in which learning is beyond the textbooks and classroom
3. Encourage and prepare students with 21 st century skills for the future with a focus in creativity, critical thinking, communication and collaboration.	3. Teachers will develop and apply ICT skills and tools in lessons and network with other teachers and students.
Students will learn to:	For Students:
1. Cooperate and collaborate with people from diverse background and cultivate understanding of different cultures	1. Students will be more competent in their communication skills and have an increased understanding of other cultures to work effectively as a team
2. Enhance their knowledge through critical thinking, creativity and problem solving	2. Students will cultivate interest in Space Exploration and development discoveries
3. Enhance and develop their ICT capabilities by applying them through creating videos, survey forms, Skype interviews and others.	3. Students will be more competent in managing ICT tools which will boost their engagement in learning
